

Symantec™ Phishing Readiness Services

Train and assess user susceptibility to phishing attacks

Data Sheet: Symantec Cyber Security Services

Symantec Phishing Readiness gives organizations the ability to carry out simulated phishing attacks from a simple, centralized platform. Create and deploy targeted emails, and analyze employee behavior using detailed metrics to assess your organization's susceptibility to phishing attacks.

Real Results at a Fortune 500 Company

UNLIMITED ASSESSMENTS TO ALL EMPLOYEES

Never be limited in the amount of email assessments you are sending to your users, allowing you to assess as often as desired. Import as many users as needed to educate the entire organization effectively.

MULTIPLE ASSESSMENT TYPES

Target emails with specific attack vectors, and gather detailed metrics through email opens, link clicks, attachments opens, or data exposure and leakage.

FULLY CUSTOMIZABLE TEMPLATES

Frequently refreshed templates for each assessment type can be further customized to match specific organizational branding, messaging, culture, or language.

INTEGRATED USER TRAINING

Integrate education during and after assessments based on user response. Choose immediate delivery or automated follow up for maximum user engagement.

DEDICATED PRIVATE INSTANCE

User data is kept private on a dedicated client instance. Control and manage your instance while keeping information and metrics secure.

DETAILED REPORTING FEATURES

Run reports on key user details and behaviors. Discover geo-located user activity, completion statistics, vulnerable clients, and activity trends to show the real results of your investment.

Comprehensive and Integrated Solutions for Success

A successful cybersecurity program requires a comprehensive strategy and integration across technology and people. Each offering in Symantec's Cyber Security Services portfolio—**Managed Security Services** for advanced threat monitoring;

DeepSight™ Intelligence for actionable technical and strategic threat intelligence; **Incident Response** for fast containment and eradication of a threat; and **Cyber Skills Development** for strengthening an entire organization's ability to recognize and prevent advanced attacks—is designed to work together and improve the speed and effectiveness of a security program.
